            a. What level of detail? (i.e., license plates, face recognition, general activity, etc.)
      ii. Who needs to monitor and where are they located?
      iii. How long does the images need to be stored? On-site? Remote?

Tele/Data Systems – 30 Minutes

1. WiFi Throughout?
2. Cabling Requirements
3. General discussion on Hard Wired Data Outlet Locations
4. Telephone System & Requirements
5. Typical Classroom Tele/Data Setup
6. Telecommunication Pathways
   a. Exterior
      i. Conduit banks vs. direct burial concrete encased?
      ii. Manholes/pull boxes
   b. Interior
      i. Outlet boxes and conduit stub-out requirements
      ii. Cable Tray vs J-hooks
      iii. Shared system cabling pathway requirements
Audio Visual Systems – 20 Minutes

1. Classroom Audio/Visual (AV) Systems
   a. AV inputs – formats/types and locations
   b. Video outputs – formats/types and locations
   c. Teacher amplification system?

2. Non-classroom AV Requirements
   a. Gymnasium – Main and Auxiliary
   b. Natatorium
   c. Cafeteria
   d. LGI
   e. Instrumental Music
   f. Choral
   g. Auditorium – To Be Discussed At A Later Date and Time

Specialty Systems – 25 Minutes

1. Paging Systems
   a. School District paging system manufacturer and/or system type preferences?
   b. Classroom call switches vs. wall phones
   c. Non-Classroom Paging locations
   d. Public area paging zone preferences
   e. Exterior paging speaker coverage areas

2. Master Clock System
   a. School District manufacturer and/or system type preferences?
   b. VOIP/Wireless
   c. Clock Locations

3. Fire Alarm System
   a. School District manufacturer and/or type preferences?
   b. Inter-connected or monitored by another location
   c. Tone vs voice audible notification (Mass Notification? notifying platforms)
