On the above date, a programming and planning meeting was held at the Dover Area School District Administrative Offices to review the Dover Area High School project. Pertinent issues and items of discussion are as follows.

1. The updated floor plans were reviewed and the following pertinent items discussed:
   a. Locate the greenhouse adjacent to an Ag Classroom and move Ag Classroom to plan west wall.
   b. Finishing room to be shared with the wood and metal shops.
   c. Add double doors between each CTC shop.
   d. A concern was raised regarding student traffic at the location of stairs and corridor intersections. CRA to investigate further.

2. A question was raised regarding gender neutral students and toilet facilities. Currently students are given a key to staff restrooms and the Nurse restroom. Currently DASD has no plans to change this method.

3. It was noted that when the existing Natatorium is demolished, the new natatorium should be available for use. CRA to investigate the feasibility of this further.

4. The site plan was reviewed and the following pertinent items discussed:
   a. A discussion was held regarding quantity and type of fields along with field use. This discussion to be revisited with the Steering Committee.

Respectfully submitted,
CRABTREE, ROHRBAUGH & ASSOCIATES
