

DASD 1:1 Device Protection

The Dover Area School District has invested in a 1:1 program to prepare students for success in the workplace. Students are allowed to take their assigned devices home; however, they remain the property of the Dover Area School District (DASD) and are configured to maximize students' learning. Students must take care and responsibility for these devices. To ensure that the district is able to repair these devices, a device coverage fee is available to all students receiving a 1:1 device. This plan will cover the student for two incidents of accidental damage per school year: ***only on the device itself***. Cases and other hardware are not covered and prices are listed in the table below. Students who do not purchase the device coverage will be responsible for the full cost of repair or replacement of the device in the event of intentional damage or loss.

Fee Structure:

- 1-3 students: \$20 each
- 4 or more students: \$70 total

What is covered (2 incidents per year):

- Accidental Drops, Falls and Spills
- Unintentional damage on charging devices
- Theft - Coverage pays for non-negligent theft. A copy of the police report must be provided to be covered.
- Fire and other natural disasters - Cover pays for loss only when an official report of the fire or natural disaster is submitted from an insurance provider or fire marshal.

What is not covered:

- Lying or providing false information on the helpdesk ticket
- Removing the device from the district provided case
- Not reporting damages in a timely manner (within 2 business days of the damage occurrence)
- Lost or misplaced hardware, cords and chargers
- District provided case is not covered under the protection fee
- More than 2 incidents of accidental damage per year
- Damages caused by third party products

DASD Device Fee Schedule For Non-Covered Incidents
